Safety Precautions

READ AND SAVE THESE INSTRUCTIONS

Thanks for purchasing Okaysou desktop air purifier. To reduce the risk of fire, electric shock or other injury, please follow all instructions and safety guidelines.

-  **This** appliance has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature. Warn the user to unplug or disconnect the appliance from the power supply before servicing.
-  **Do not** use solvent-based desktop air purifiers such as alcohol or thinner.
-  **Do not** place the desktop air purifier in a place where flammable gas is easily leaked to a gas leak and cause a fire. Do not use in a flammable, explosive or corrosive atmosphere.
-  **Do not** pull on the power cord while moving or storing.
-  **Do not** touch the power cord plug with wet hands.
-  **Please** supervise and guide young children to avoid direct operation or contact with desktop air purifiers.
-  **Do not** put your fingers or metal objects in the gaps between the air inlet and the air outlet. Do not allow volatile substances or combustible materials, such as cigarettes, to float into the unit.
-  **There** is an electric control board on the base, please pay attention to waterproof.
-  **The** front side of the unit is in the air, and the top is out of the air. Do not block or block the air inlet and outlet.
-  **Do not** use the power cord or plug if it is damaged. Do not touch the power cord with wet hands.
-  **Regularly** check and replace the filter. If the filter is blocked, the air will be ineffective and the power consumption will increase, causing malfunction.
-  **When** not in use for a long time, please turn off the power to avoid exposure to sunlight.

Power cord Considerations

-  **When** moving or performing maintenance on the desktop air purifier, be sure to stop the operation and unplug the power cord
-  **If** the machine fails, stop using it and turn off the power. First, follow the instructions for troubleshooting. If it can't be eliminated, please contact the after-sales personnel for inspection.
-  **Do not** use power beyond the rated voltage(120V 60Hz). (Otherwise it will cause fire and electric shock and so on.)
-  **Do not** process the power line arbitrarily, bend the power line forcibly, draw, twist and bundle up the power line.
-  **Do not** let the power line approach to the high temperature objects. (If the power line is worn, fire and electric shock will occur.)
-  **Do not** put the heavy objects on it or press. (Overloading may cause fire and electric shock and so on.)
-  **Do not** use when the power line or power plug is worn and loose. (Otherwise it will cause fire, electric shock, short circuit and so on.)
-  **Do not** insert and pull the power line with wet hands. (Otherwise it will cause electric shock and so on.)
-  **Do not** change the power line without permission. When necessary, please contact with consumer service center.
-  **Clean** regularly the dust on the power plug and socket. (Too much dust and moisture may cause defective insulation and then fire and electric shock will occur.)

WARNING

Non-professional personnel should not dismantle the machine without permission in case of electric shock danger. PIs pull out the power plug when changing or cleaning the filter set. In case of failure, please follow the troubleshooting method in the manual. if not, please contact support@okaysou.com.

Know Your Air Purifier

|---------------------------|--|
| A: Low speed indicator | I: Sleep mode switch |
| B: Medium speed indicator | J: Dimmer switch |
| C: High speed indicator | K: Air Outlet |
| D: Timer indicators | L: Ambient light |
| E: Timing function switch | M: Air Inlet |
| F: ON/OFF | N: 3 in 1 Ultra-Duo filter (Pre-filter+HEPA
filter (H13)+Active carbon cotton filter) |
| G: Fan speed switch | O: Filter Cover |
| H: Filter reset switch | |

Control Panel

On/Off Button

Turns the air purifier on/off. After the air purifier is turned on, the buzzer beeps, the wind speed defaults to the lowest, the corresponding function indicator lights, and the ambient light is in the highest brightness.

Fan Speed Button

Adjusts fan speeds from low, medium, and high.

Sleep Mode Button

Turns sleep function on/off. After pressing the sleep button, all the indicator lights and the nightlight turns off, and the fan speed automatically enters the lowest level. 3s later, the indicator light of sleep mode will turn off. Except the sleep mode and dimmer button, all other functions are deactivated. Press sleep button again to exist.

Timer Function Button

Customizes working hours from 2/4/8/no timer.

Dimmer Button

Adjusts the ambient light from high, low and off.

Filter Reset Indicator

Lights up when the air filter should be replaced. After changing the filter, press the button for 3s to reset. The buzzer will sound once and the reminder light will turn off.

Getting Started

1. Flip the air purifier over. Twist the filter counterclockwise indicated by the arrow and remove it. [Figure 1.1]
2. Remove the plastic package of the filter and place it back into the purifier. This filter does not have the top or button and can be installed either way. [Figure 1.2]

Figure 1.1

Figure 1.2

3. Replace the filter cover and twist clockwise to lock. [Figure 1.3]

Figure 1.3

4. Place the purifier on a flat, stable surface. Keep away from anything that would block air inlet and outlet.
5. Plug in and tap the power button to turn on the purifier and enjoy fresh air.

About the Filter

The air purifier uses a 3-stage purification system to purify air.

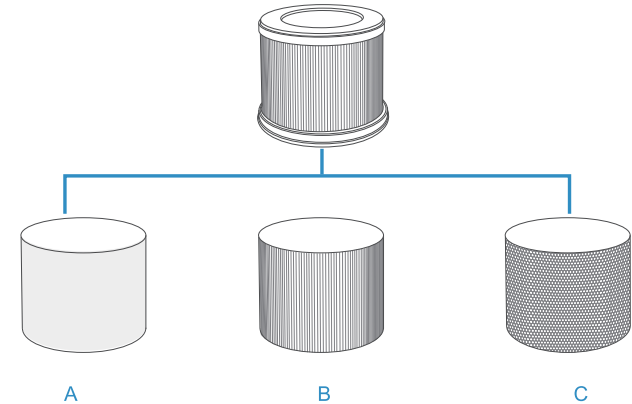

Figure 2.1

- A. Washable & Detachable Pre-filter: Captures large particles such as dust, fibers, pet fur, hair etc. Largely extend the purifier's life. (Pre-installed)
- B. Home Medical Grade H13 True HEPA Filter: Removes 99.97% of airborne particles 0.3 micrometers in diameter; Filters small particles such as smoke, tiny dust particles, mold spores, bacteria, viruses, and allergens such as pollen, dander and mites.
- C. High-Efficiency Active Carbon Cotton Filter: Effectively absorbs stubborn and unwanted odors and fumes. Filters compounds such as formaldehyde, ammonia, hydrogen sulfide, benzene and volatile organic compounds (VOCs).

Replacing the Filter

When Should I Replace the Air Filter?

The filter should be replaced every 6–8 months.

You may need to replace your filter sooner or later depending on how often you use your air purifier. Using your air purifier in an environment with relatively high pollution may mean you will need to replace the filter more often, even if the replacement filter indicator is off.

You may need to replace your filter if you notice:

- Increased noise when the air purifier is on
- Decreased airflow
- Unusual odors
- A visibly clogged filter

NOTE

- To maintain the performance of your air purifier, only use official Okaysou filters. To buy replacement filters, visit Okaysou's online store. Go to okaysou.com for more information.
- Remember to reset after changing the filter.

Check Filter Indicator

 will light up as a reminder to check the air filter. Depending on how much you use the air purifier, the indicator should turn on within 6–8 months. You may not need to replace your filter yet, but you should check it when  turns on.

Replacing the Air Filter

1. Unplug the air purifier. Flip the air purifier over and remove the filter cover.
2. Remove the old air filter.
3. Clean out any remaining dust or hair inside the purifier using a vacuum hose. Do not use water or liquids to clean the purifier. [Figure 3.1]

4. Unwrap the new air filter and place it into the housing (see Getting Started, page 8).
5. Replace the cover. Plug in the air purifier.
6. Reset the Check Filter Indicator.

Figure 3.1

Resetting the Filter Replacement Indicator

Reset the Check Filter Indicator when it lights up.

1. Replace the air filter.
2. Turn on the air purifier.
3. Press and hold the filter replacement indicator for 3 seconds.
4. Filter replacement indicator will turn off when successfully reset.

Maintenance

When the machine is maintained, checked and moved, please stop running and pull the power plug. Please do not use wet hand to plug in or pull out the power plug. Otherwise it may cause electric shock and injury.

Clean the Air Purifier

- Unplug before cleaning.
- Wipe the outside of the air purifier with a soft, dry cloth. If necessary, wipe the housing with a damp cloth, then immediately dry.
- Do not clean with abrasive chemicals or flammable cleaning agents.

NOTE

- Do not use too hot water (higher than 40 °C), or it may cause fade deformation.
- Do not wash the air purifier's body with water.

Clean the Air Filter

- The H13 True HEPA filter should be cleaned once a month to increase its efficiency and extend the life.
- The pre-filter is detachable to wash, if washing, please wait it completely dry before installing
- Clean the inside and outside of the filter with a soft brush or vacuum hose to remove hair, dust, and large particles.
- It is suggested to replace the filter 6-8 months depending on your surrounding air condition.
- Do not clean the filter with water or other liquids.

Long Idle Time

- Pull out the power cord.
- Cover the machine with plastic bag and place it in a dry place for safekeeping.
- Do not store the purifier upside down, or it may lead to product failure.

Troubleshooting

Problem	Possible Solution
Air purifier will not turn on or fail to respond to button controls	Plug in the air purifier
	Plug the air purifier into a different outlet
	Air purifier is malfunctioning. Contact customer support
Airflow is significantly reduced	Make sure the filter is removed from its packaging and properly in place
	Tap  to increase the fan speed
	Make sure there is at least 50cm of clearance on all sides of the air purifier
	Replace the filter
Air purifier makes an unusual noise when the fan is on	Make sure the filter is properly in place with plastic packaging removed
	Make sure the air purifier is placed on a hard, flat surface
	The air purifier may be damaged, or a foreign object may be in side. Stop using the air purifier and contact customer support. Do not try to repair the air purifier
Strange smell coming from the purifier	Clean the filter or replace if necessary
	Make sure not to use your air purifier in an area with high humidity or while diffusing essential oils
	Contact customer support
 is still on after replacing the filter	Reset the filter according to the guideline

Problem	Possible Solution
Poor air purification quality	The filter has absorbed too much peculiar smell and dust, change the filter
	Close doors and windows while using the air purifier
	Make sure the room is suitable for air purifier. The air purifier may not be as effective in larger rooms
	Tap  to increase the fan speed
Poor air purification quality	Make sure no objects are blocking the sides or top of the air purifier (the air inlet or outlet)
	Make sure the filter is removed from its packaging and properly in place
 has not turned on within or after 6 months	 is a reminder for you to check the filter and will light up based on how long the air purifier has been used. If you don't use your air purifier often,  will take longer to turn on
 turned on before six months	 is a reminder for you to check the filter and will light up based on how long the air purifier has been used. If you run your air purifier frequently,  will turn on sooner
Air does not flow evenly out of the air purifier	This is due to the design of the air purifier. This is normal and will not affect the air purifier's efficiency

Warranty Information

Okaysou warrants all products to be of the highest quality in material, craftsmanship, and service, effective starting from the date of purchase.

Okaysou will replace any product found to be defective due to manufacturer flaws based on eligibility. Refunds are available within the first 30 days of purchase. Refunds are only available to the original purchaser of the product.

This warranty is non-transferrable. Okaysou is not responsible in any way for any damages, losses, or inconveniences caused by equipment failure by user negligence, abuse, or use noncompliant with the user manual or any additional safety, use, or warnings included in the product packaging and manual.
